

Brambleton Community Association

Board of Directors 2021 Election

Michael Gilligan: Introductory Statement

Hello, my name is Michael Gilligan, my family and I were delighted to become Brambleton residents in the summer of 2019. We fell in love with Brambleton at first sight and knew it was the place for us. Like many of us, I have children at our local schools, a precocious first-grader at Madison's Trust and an artistic seventh-grader at Brambleton Middle. My wife and I are tech leaders for a major bank. We have lived in several states but are glad to now call Virginia our home. I want to add my voice to the BCA board as a representative of an everyday family. Thank you.

Candidate Profile: Michael Gilligan
Years in Brambleton: 1 Year

Five Goals for Serving Brambleton

1. As a member of the board, I seek to bring greater communications of the workings and focuses of the board to the general Brambleton community.
2. As a resident of Brambleton, I have a personal stake in the safety and well-being of the community, and I seek to ensure that, in the spaces the Brambleton Association is responsible for, the BCA provides appropriate investments in this area. Such items might be as simple as more streetlights to make it safer to walk at night, ensuring maintenance of the currently installed lighting, and efforts of that nature.
3. In this time of the pandemic, cleanliness has risen to the top of all of our minds. I hope to be able to bring simple changes such as an increased number of public waste cans to reduce litter, or more proactive efforts to reduce animal waste in public areas.
4. Our common spaces are a shared treasure. Our pools and parks are available and enjoyed by all and make Brambleton a great place to live. I wish to ensure that they remain a high priority for the board.
5. Being well managed financially is key to a successful community. Brambleton already excels in returning great value to our residents and I wish to ensure that we continue this path.

Relevant Community, Professional, and Leadership Activities

In my professional career, I have been a leader of teams and departments for 20 years. I have been a team lead, manager, and director for the technology departments of several financial services firms throughout my career, leading teams of 4 to 18 developers in creating and supporting their internet products. For several of these roles, the team I led was the most customer-facing, revenue-generating and technology-leading team for that company.
